to obtain the degree of Master of Science in Mechanical Engineering  
at the École polytechnique fédérale de Lausanne  
to be defended publicly on 21 December 2025

**Student number:** 123456  
**Project duration:** Feb 2024 – June 2024  
**Supervisor:** Prof. Dr. Bugra Koku  
**Thesis committee:** Prof. Dr. Eres Soylemez  
Prof. Dr. Turgut Tumer  
Prof. Dr. Kemal Ozgoren

An electronic version of this thesis is available at <https://your-portfolio-link.com>

# 1

## Introduction

This chapter summarizes the extra features available in this template.

When first importing this template (during `#import "@preview/classy-tudelft-thesis:0.1.0": *`) at the top of `main.typ`, several imports occur. These are:

- `wrap-it`, version 0.1.1. The function here are used, and slightly modified for proper caption sizing.
- `equate`, version 0.3.2. Is imported to enable multi-line equation numbering out of the box, and sets the defaults `show: equate.with(breakable: false, sub-numbering: false)`. For more information, please visit the documentation of `equate`.

In addition to these “included” imports, at the top of `main.typ`, the following packages are also imported:

```
// Physics-related tools for equations
#import "@preview/physica:0.9.6": *
// Specifying quantities and units
#import "@preview/unify:0.7.1": num, numrange, qty, qtyrange
// Formatting of uncertainties
#import "@preview/zero:0.5.0"
```

For more imformation on these packages, please consult their documentation.

Here follows a small overview of equation-related behaviour in this template.

For example, here is a new paragraph containing two aligned equations:

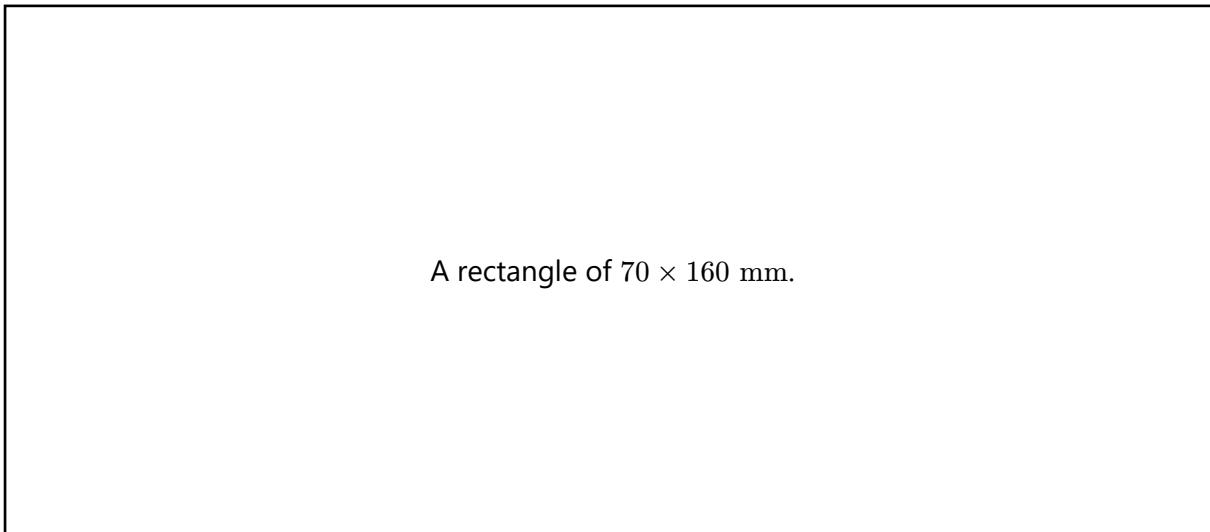

$$e^{\pi i} = -1 \tag{1.1}$$

$$(n+1)! = \int_0^\infty t^n e^{-t} dt \quad \text{cauchy_factorial} \quad a^2 + b^2 = c^2 \tag{1.2}$$

To specify quantities (with units) and uncertainties, please refer to the `unify` and `zero` packages.

The page layout is set as A4, with margins of 25 mm. As an A4 page is 210 mm wide, full-width figures should be at most 160 mm wide. Each page that is not the start of a chapter has a header, containing the current chapter name on the left in SMALLCAPS font, and your name on the right side of the header. The bottom of the page contains the page number, which uses lowercase roman numerals in the front matter, and arabic numerals for the main text.

Tables and images can be inserted into the document via the `#figure` function. Here follow some examples, which are Figure 1 and Figure 2. Please check out the source code of this text to understand how.

A rectangle of  $70 \times 160$  mm.

**Figure 1:** An example of a large figure. Full-width figures should be 160 mm wide.

For smaller figures, it is also possible wrap them within text. For example, Figure 2. Below, a small table can be found. Note the alignment of the decimal columns achieved via the `zero` package.

  Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut enim aequo doleamus animo, cum corpore dolemus, fieri tamen permagna accessio potest, si aliquod aeternum et infinitum impendere malum nobis opinemur. Quod idem licet transferre in voluptatem, ut postea variari voluptas distingue possit, augeri amplificarique non possit. At.

**Figure 2:** An example of a small figure.

**Table 1:** A small table.

A	B
1.0	2.0
10.0	0.35

Here is a chemical formula:  $\text{H}_2\text{O}$ . This works via a simple function `#chem` which subscripts all numbers.

The main font used in this template is `Stix Two Text, 11pt`, with equations typeset using `STIX Two Math`. The large headings for title, subtitle and name on the cover and title pages are typeset using `Roboto`. The big numbers in chapter titles are typeset using `Lora`. These fonts are included by

default in the online typst editor, but should be installed when compiling locally. In addition, the main text and math fonts are customizable.

# 2

## Full template example

Here follows a full example of how to use the template. This example is the same a what is specified in `main.typ` after initializing the template.
